

# Puerta corredera simple

Una puerta corredera simple se utiliza generalmente cuando no hay suficiente espacio para abrir una puerta con bisagras laterales para el acceso normal y cuando solo se necesita tener abierta una sola sección.

(Los soportes, las asas y los paneles no están incluidos en el kit de la puerta. Las dimensiones de apertura pueden estar limitadas en función del tipo de cierre elegido.)

## Modelos

RIPCIÓN	ANCHURA (MM)	MAX ANCHURA (MM)	ALTURA (MM)	MAX ALTURA (MM)	PANEL	SE AJUSTA AL POSTE
